Information Technology Law: The Law and Society Andrew Murray
Information Technology Law: The Law and Society is the ideal companion for a course of study on IT law and the ways in which it is evolving in response to rapid technological and social change.

This ground-breaking work is the first textbook to systematically examine how the law and legal process of the UK interacts with the modern 'information society' and the fast-moving process of digitization. It examines the challenges that this fast pace of change brings to the established legal order, which was developed to meet the needs of a traditional physical society.

To address these issues, this book begins by defining the information society and discussing how it may be regulated. From there it moves to questions of Internet governance and rights and responsibilities in the digital environment.

Particular attention is paid to key regulatory 'pressure points', including:
DT copyright for digital products
DT identity fraud
DT electronic commerce
DT privacy and surveillance

Possible future challenges and opportunities are outlined and discussed, including e-government, virtual environments and property, and the development of web 3.0. Information Technology Law: The law and society covers all aspects of a course of study on IT law, and is therefore an ideal text for students. The author's highly original and thought-provoking approach to the subject also makes it essential reading for researchers, IT professionals, and policymakers.

This new edition will include expanded coverage of defamation & privacy as well as substantial revisions to Part II on the governance of the information society.

ONLINE RESOURCE CENTRE
This edition is accompanied by the following online resources:

Kathleen Elder:

Is it an individual who having spare time in that case spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Information Technology Law: The Law and Society can be the response, oh how comes? A fresh book you know. You are so out of date, spending your free time by reading in this new era is common not a geek activity. So what these textbooks have than the others?

Jodie Kahl:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library or to make summary for some publication, they are complained. Just small students that has reading's heart and soul or real their hobby. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Information Technology Law: The Law and Society can make you experience more interested to read.
