Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) H. R. Everett

Military drones have recently been hailed as a revolutionary new technology that will forever change the conduct of war. And yet the United States and other countries have been deploying such unmanned military systems for more than a century. Written by a renowned authority in the field, this book documents the forgotten legacy of these pioneering efforts, offering the first comprehensive historical and technical accounting of unmanned air, land, sea, and underwater systems. Focusing on examples introduced during the two world wars, H. R. Everett meticulously traces their development from the mid-nineteenth century to the early Cold War. A pioneering Navy roboticist, Everett not only describes these systems in detail but also reverse-engineers the designs in order to explain how they operated in real-world conditions of the time. More than 500 illustrations -- photographs, drawings, and plans, many of them never before published -- accompany the text.

Everett covers the evolution of early wire-guided submersibles, tracing the development of power, propulsion, communication, and control; radio-controlled surface craft, deployed by both Germany and Great Britain in World War I; radio-controlled submersibles; radio-controlled aircraft, including the TDR-1 assault drone project in World War II -- which laid the groundwork for subsequent highly classified drone programs; and radio-controlled ground vehicles, including the Wehrmacht's Goliath and Borgwald demolition carriers.

From reader reviews:

Richard Vazquez:

Here thing why this Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) are different and trustworthy to be yours. First of all reading through a book is good nevertheless it depends in the content from it which is the content is as tasty as food or not. Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) giving you information deeper as different ways, you can find any guide out there but there is no guide that similar with Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series). It gives you thrill reading through journey, its open up your personal eyes about the thing this happened in the world which is maybe can be happened around you. You can actually bring everywhere like in park, café, or even in your way home by train. If you are having difficulties in bringing the paper book maybe the form of Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) in e-book can be your choice.

Alex Jose:

This Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) is fresh way for you who has fascination to look for some information as it relief your hunger info. Getting deeper you into it getting knowledge more you know or you who still having small amount of digest in reading this Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) can be the light food for you because the information inside this particular book is easy to get by anyone. These books acquire itself in the form that is certainly reachable by anyone, yeah I mean in the e-book application form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss that! Just read this e-book type for your better life as well as knowledge.

Tina Alley:

What is your hobby? Have you heard this question when you got college students? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person similar to reading or as reading through become their hobby. You have to know that reading is very important and also book as to be the factor. Book is important thing to increase you knowledge, except your own teacher or lecturer. You will find good news or update with regards to something by book. Amount types of books that can you decide to try be your object. One of them are these claims Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series).

Christopher Pruett:

Reading a book make you to get more knowledge as a result. You can take knowledge and information from

your book. Book is prepared or printed or descriptive from each source which filled update of news. On this modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just seeking the Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) when you needed it?
