Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering)

Bernice Kastner, Engineering

Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering) Bernice Kastner, Engineering

Created by NASA for high school students interested in space science, this collection of worked problems covers a broad range of subjects, including mathematical aspects of NASA missions, computation and measurement, algebra, geometry, probability and statistics, exponential and logarithmic functions, trigonometry, matrix algebra, conic sections, and calculus. In addition to enhancing mathematical knowledge and skills, these problems promote an appreciation of aerospace technology and offer valuable insights into the practical uses of secondary school mathematics by professional scientists and engineers.

Geared toward high school students and teachers, this volume also serves as a fine review for undergraduate science and engineering majors. Numerous figures illuminate the text, and an appendix explores the advanced topic of gravitational forces and the conic section trajectories.

From reader reviews:

Diana Brunswick:

Information is provisions for those to get better life, information nowadays can get by anyone on everywhere. The information can be a know-how or any news even a problem. What people must be consider whenever those information which is inside former life are hard to be find than now is taking seriously which one is acceptable to believe or which one often the resource are convinced. If you find the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering) as the daily resource information.

Nadine Taylor:

The publication with title Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering) has lot of information that you can discover it. You can get a lot of gain after read this book. This book exist new understanding the information that exist in this publication represented the condition of the world right now. That is important to you to be aware of how the improvement of the world. This book will bring you inside new era of the the positive effect. You can read the e-book with your smart phone, so you can read this anywhere you want.

Clare Andrews:

Precisely why? Because this Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering) is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will jolt you with the secret that inside. Reading this book adjacent to it was fantastic author who have write the book in such remarkable way makes the content within easier to understand, entertaining means but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This unique book will give you a lot of positive aspects than the other book include such as help improving your expertise and your critical thinking technique. So , still want to delay having that book? If I were you I will go to the reserve store hurriedly.

Holly Walker:

A number of people said that they feel bored stiff when they reading a publication. They are directly felt it when they get a half elements of the book. You can choose typically the book Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering) to make your own reading is interesting. Your own skill of reading talent is developing when you including reading. Try to choose straightforward book to make you enjoy to learn it and mingle the impression about book and studying especially. It is to be first opinion for you to like to open up a book and examine it. Beside that the book Space Mathematics: Math Problems Based on Space Science (Dover Books on Aeronautical Engineering) can to be a newly purchased friend when you're really feel alone and confuse with the information must

you're doing of these time.
