Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R

Helmut Pruscha

Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R Helmut Pruscha

The book presents the application of statistical methods to climatological data on temperature and precipitation. It provides specific techniques for treating series of yearly, monthly and daily records. The results' potential relevance in the climate context is discussed.

The methodical tools are taken from time series analysis, from periodogram and wavelet analysis, from correlation and principal component analysis, and from categorical data and event-time analysis.

The applied models are - among others - the ARIMA and GARCH model, and inhomogeneous Poisson processes.

Further, we deal with a number of special statistical topics, e.g. the problem of trend-, season- and autocorrelation-adjustment, and with simultaneous statistical inference.

Programs in R and data sets on climate series, provided at the author's homepage, enable readers (statisticians, meteorologists, other natural scientists) to perform their own exercises and discover their own applications.

From reader reviews:

Georgia Hernandez:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each book has different aim as well as goal; it means that e-book has different type. Some people experience enjoy to spend their the perfect time to read a book. They can be reading whatever they get because their hobby will be reading a book. What about the person who don't like examining a book? Sometime, individual feel need book once they found difficult problem or perhaps exercise. Well, probably you will need this Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R.

Kevin Pinkney:

This book untitled Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R to be one of several books that best seller in this year, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this book in the book shop or you can order it through online. The publisher with this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

Cynthia Bryant:

Typically the book Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R will bring that you the new experience of reading some sort of book. The author style to clarify the idea is very unique. Should you try to find new book you just read, this book very ideal to you. The book Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R is much recommended to you to study. You can also get the e-book from the official web site, so you can quickly to read the book.

Anna Hart:

This Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R is great reserve for you because the content which can be full of information for you who always deal with world and have to make decision every minute. This kind of book reveal it info accurately using great coordinate word or we can point out no rambling sentences inside it. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but tricky core information with attractive delivering sentences. Having Statistical Analysis of Climate Series: Analyzing, Plotting, Modeling, and Predicting with R in your hand like keeping the world in your arm, details in it is not ridiculous 1. We can say that no book that offer you world in ten or fifteen second right but this publication already do that. So , it is good reading book. Hello Mr. and Mrs. active do you still doubt that will?
