Principles of Space-Time Adaptive Processing (Radar, Sonar and Navigation)

Richard Klemm

Principles of Space-Time Adaptive Processing (Radar, Sonar and Navigation) Richard Klemm

This book presents a systematic introduction to airborne MTI (moving target indication) system design for use in the fields of earth observation, surveillance and reconnaissance, with particular regard to the suppression of clutter returns. New developments in the field and special aspects of airborne MTI radar are included and make this book the definitive text on the principles of STAP.
